ABOUT

Software Engineer (Full-Stack Developer) with over four (4+) years of experience developing innovative technology solutions and solving real-world digital problems. Passionate about building scalable, efficient, and impactful web applications. Strong expertise in both frontend and backend development, with a focus on responsive user interfaces, system performance, and clean architecture. Open to remote opportunities.

SKILLS

Frontend:

HTML, CSS, Tailwind CSS, JavaScript, React, Next.js, TypeScript

Backend:

Node.js, Express.js, Socket.io, Python

Databases:

MongoDB, PostgreSQL, MySQL, Supabase

Tools:

Git, GitHub, REST APIs

Product & Project Skills:

Product Management, Requirements Analysis, Feature Planning, Team Collaboration

EXPERIENCE

KINPLUS TECHNOLOGY

Frontend Developer

- Developed responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and modern frameworks.
- Translated UI/UX designs into clean, functional, and reusable components.
- Collaborated with backend developers to integrate APIs and dynamic features.

- Improved website performance, accessibility, and cross-browser compatibility.
- Participated in code reviews and team problem-solving sessions.

PLP LEARN PROJECT, KENYA

Full-Stack Developer

- Designed and built full-stack web applications using JavaScript, React, Node.js, and databases.
 - Worked on real-world projects from planning to deployment, with a focus on scalability and performance.
 - Implemented authentication systems, CRUD operations, and RESTful APIs.
 - Used Git and GitHub for version control and collaborated effectively in team-based environments.
 - Strengthened problem-solving skills through hands-on development and debugging.
-

PROJECTS

Finance Tracker Application

Python | Pandas | Data Analysis

- Developed a finance tracking application to monitor income, expenses, and savings.
- Processed and analyzed financial data to generate summaries, trends, and spending insights.
- Implemented data cleaning and validation to ensure accurate and reliable reports.
- Automated monthly and category-based expense analysis for better financial decision-making.
- Improved data organization and reporting efficiency using structured datasets.

School Portal Web Application

Full-Stack | JavaScript | React | Node.js | Database

- Designed and developed a school portal for managing students, staff, courses, and academic records.
 - Implemented secure authentication and role-based access for administrators, teachers, and students.
 - Built dashboards for viewing student profiles, results, and announcements.
 - Integrated backend APIs for efficient data storage, updates, and retrieval.
 - Ensured performance optimization, usability, and responsive design across devices.
 - Used Git and GitHub for version control and collaborative development.
-

EDUCATION

Ekiti State University, Ado-Ekiti
Bachelor of Science (B.Sc.) in Computer Science
